See reconciliations of GAAP to non-GAAP measures beginning on page 9.

Q3 2022 HIGHLIGHTS

- Revenue increased 8% year-over-year reflecting:
    - 7% growth from Angi Ads and Leads, the second consecutive quarter of growth
    - 12% growth from Angi Services to $132 million
    - 2% growth in Europe (19% growth in local currency)
- Gross profit increased 7% to $389 million.
- Operating loss improved to $11 million (compared to a loss of $15 million in Q3 2021) and Adjusted EBITDA increased 85% to $23 million.
- Transacting Service Professionals were 200,000 and Advertising Service Professionals were 37,000.
- Monetized Transactions were 4.3 million in Q3 2022 with nearly 17 million for the trailing twelve months.

Adjusted EBITDA			
North America	$ 20.8	$ 11.2	85%
Europe	2.1	1.2	77%
Total	$ 22.9	$ 12.4	85%

- Operating loss decreased $3.9 million to $11.1 million reflecting:
  - Adjusted EBITDA increasing 85% to $22.9 million due to:
    - Gross profit increasing 7% to $389.0 million
    - Lower selling and marketing expense as a percentage of revenue due primarily to the anniversary of the consolidation under a single brand on March 17, 2021, which had adversely affected both free and paid search engine marketing efforts in the prior year, and improved salesforce efficiency
  - $3.6 million higher stock-based compensation expense due primarily to management departures and new grants issued over the past year

Income Taxes

The Company recorded an income tax benefit of $0.9 million in Q3 2022 for an effective tax rate of 5%, lower than the statutory rate due primarily to lower realized tax benefits related to the vesting of stock-based awards and state taxes. The Company recorded an income tax benefit of $4.8 million in Q3 2021 for an effective tax rate of 22%, which is higher than the statutory rate due primarily to an adjustment to non-deductible stock-based compensation, largely offset by foreign income taxed at different rates.

Total Diluted Shares Outstanding			**510.0**	**510.0**	**510.0**	**510.1**	**510.1**

The dilutive securities presentation is calculated using the method and assumptions described below, which are different from those used for GAAP dilution, which is calculated based on the treasury stock method.

The Company currently settles all equity awards on a net basis; therefore, the dilutive effect is presented as the net number of shares expected to be issued upon exercise or vesting, and in the case of options, assuming no proceeds are received by the Company. Any required withholding taxes are paid in cash by the Company on behalf of the employees assuming a withholding tax rate of 50%. In addition, the estimated income tax benefit from the tax deduction received upon the exercise or vesting of these awards is assumed to be used to repurchase Angi Inc. shares. Assuming all awards were exercised or vested on November 4, 2022, withholding taxes paid by the Company on behalf of the employees upon net settlement would have been $19.9 million, assuming a stock price of $1.93 and a 50% withholding rate. The table above assumes no change in the fair value estimate of the non-publicly traded subsidiary denominated equity awards from the values used at September 30, 2022.

ANGI INC. PRINCIPLES OF FINANCIAL REPORTING

Angi Inc. reports Europe Revenue excluding Foreign Exchange Effects, Adjusted EBITDA and Free Cash Flow, all of which are supplemental measures to U.S. generally accepted accounting principles ("GAAP"). These are among the primary metrics by which we evaluate the performance of our businesses and on which our internal budgets are based and may impact management compensation. We believe that investors should have access to, and we are obligated to provide, the same set of tools that we use in analyzing our results. These non-GAAP measures should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for or superior to GAAP results. Angi Inc. endeavors to compensate for the limitations of the non-GAAP measures presented by providing the comparable GAAP measures with equal or greater prominence and descriptions of the reconciling items, including quantifying such items, to derive the non-GAAP measures. We encourage investors to examine the reconciling adjustments between the GAAP and non-GAAP measures, which are included in this release. Interim results are not necessarily indicative of the results that may be expected for a full year.

Definitions of Non-GAAP Measures

Europe Revenue Excluding Foreign Exchange Effects is calculated by translating current period revenues using prior period exchange rates. The percentage change in Europe Revenue Excluding Foreign Exchange Effects is calculated by determining the change in current period revenues over prior period revenues where current period revenues are translated using prior period exchange rates. We believe the impact of foreign exchange rates on Europe's revenue may be an important factor in understanding period over period comparisons if movement in rates is significant. Since our results are reported in U.S. dollars, European revenues are favorably impacted as the U.S. dollar weakens relative to other foreign currencies, and unfavorably impacted as the U.S dollar strengthens relative to other foreign currencies. We believe the presentation of Europe Revenue Excluding Foreign Exchange Effects in addition to reported revenue helps improve the ability to understand the performance of Europe because it excludes the impact of foreign currency volatility that is not indicative of Europe's core operating results.

Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (Adjusted EBITDA) is defined as operating income excluding: (1) stock-based compensation expense; (2) depreciation; and (3) acquisition-related items consisting of amortization of intangible assets and impairments of goodwill and intangible assets, if applicable. We believe this measure is useful for analysts and investors as this measure allows a more meaningful comparison between our performance and that of our competitors. Adjusted EBITDA has certain limitations because it excludes the impact of these expenses.

Free Cash Flow is defined as net cash provided by operating activities, less capital expenditures. We believe Free Cash Flow is useful to investors because it represents the cash that our operating businesses generate, before taking into account non-operational cash movements. Free Cash Flow has certain limitations in that it does not represent the total increase or decrease in the cash balance for the period, nor does it represent the residual cash flow for discretionary expenditures. For example, it does not take into account mandatory debt service requirements. Therefore, we think it is important to evaluate Free Cash Flow along with our consolidated statement of cash flows.

Non-Cash Expenses That Are Excluded from Adjusted EBITDA

Stock-based compensation expense consists of expense associated with the grants, including unvested grants assumed in acquisitions, of stock appreciation rights (SARs), restricted stock units (RSUs), stock options and performance-based RSUs and market-based awards. These expenses are not paid in cash and we view the economic costs of stock-based awards to be the dilution to our share base; we also include the related shares in our fully diluted shares outstanding for GAAP earnings per share using the treasury stock method. Performance-based RSUs and market-based awards are included only to the extent the applicable performance or market condition(s) have been met (assuming the end of the reporting period is the end of the contingency period). The Company is currently settling all stock-based awards on a net basis and remits the required tax-withholding amounts from its current funds.

Please see page 5 for a summary of our dilutive securities as of November 4, 2022 and a description of the calculation methodology.

Depreciation is a non-cash expense relating to our capitalized software, leasehold improvements and equipment and is computed using the straight-line method to allocate the cost of depreciable assets to operations over their estimated useful lives, or, in the case of leasehold improvements, the lease term, if shorter.

Amortization of intangible assets and impairments of goodwill and intangible assets are non-cash expenses related primarily to acquisitions. At the time of an acquisition, the identifiable definite-lived intangible assets of the acquired company, such as service professional relationships, technology, memberships, customer lists and user base and trade names, are valued and amortized over their estimated lives. Value is also assigned to acquired indefinite-lived intangible assets, which comprise trade names and trademarks, and goodwill that are not subject to amortization. An impairment is recorded when the carrying value of an intangible asset or goodwill exceeds its fair value. We believe that intangible assets represent costs incurred by the acquired company to build value prior to acquisition and the related amortization and impairments of intangible assets or goodwill, if applicable, are not ongoing costs of doing business.
